Healthcare Cloud Login Portal

Enterprise patient access system

TECH USED: HTML 5 · CSS 3 · jQuery · Microsoft Azure

Project Video

PROBLEM:

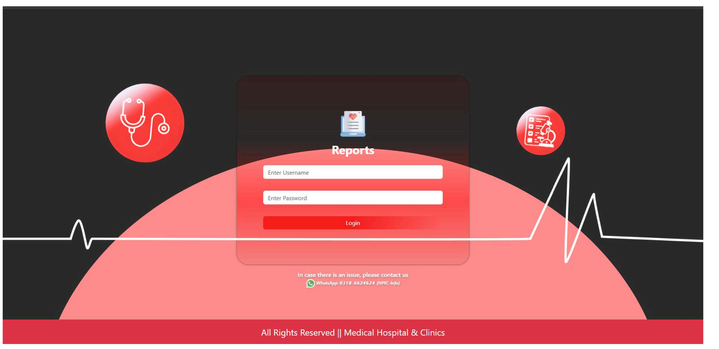
Secure access to multi-department patient reports was fragmented and difficult to navigate across devices.

SOLUTION:

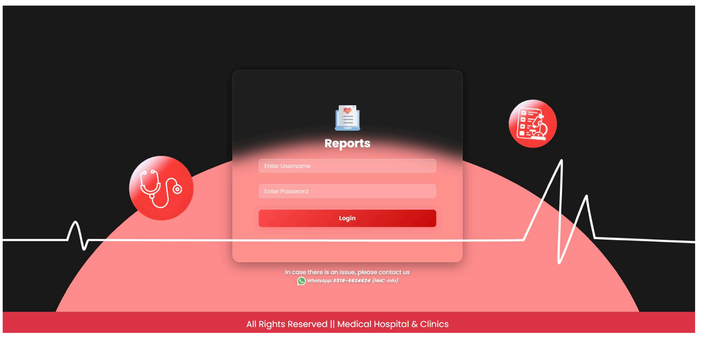
WIth the collaboration of UI/UX designer. I make the UI for login portal and Patient user info to display.
Their existing tech was using jquery so I had to built the UI on the html and css.

OUTCOME:

The user was able to easily view, download and send the report through email sending feature.
The UI clearly convery the patient info to the user.
Even in moblie view, he could view patient info gracefully



OLD LOGIN PORTAL

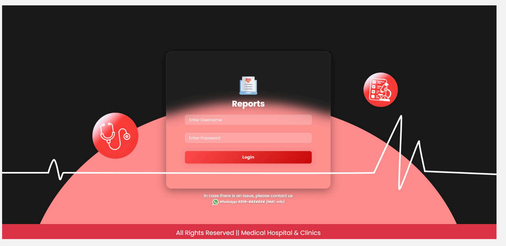


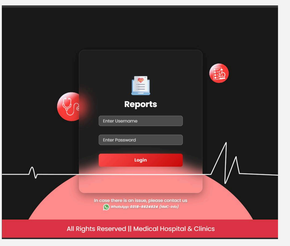
DESIGN LOGIN PORTAL

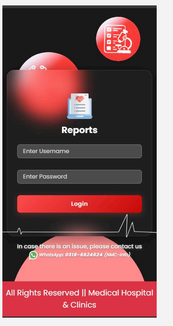
Patient INFO UI

RESPONSIVE VIEW

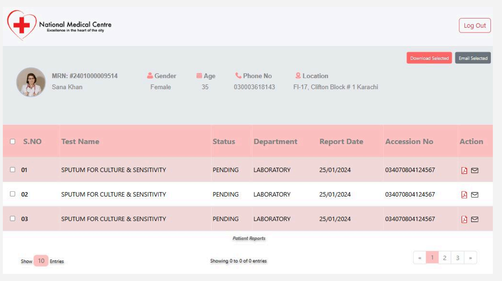
LOGIN PORTAL



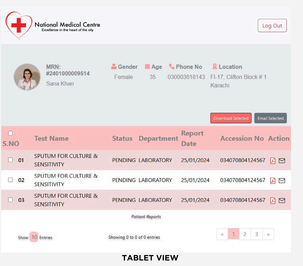




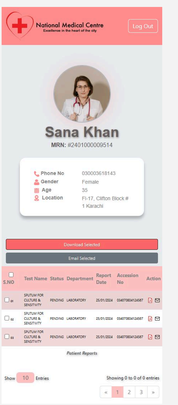
PATIENT INFO



DESKTOP VIEW



TABLET VIEW



MOBLIE VIEW

Custom Loader
